RAPTOR 660*	624-7261
RAPTOR 700R	624-7262

• **STAINLESS STEEL**

Akrapovic's high-end Evolution system has a conical, titanium header that is attached to a conical titanium link pipe. The link pipe is welded to the muffler. The muffler's core is made of stainless steel, while its outlet cap and outer sleeve are made of titanium. The system is attached to the quad using a pair of beefy carbon-fiber clamps. All Evo ATV systems come to America with removable, approved spark arresters.

SLIP-ON EXHAUST

RAPTOR 700R	624-7215

Akrapovic's less-expensive Slip-Ons come with a cylindrical, stainless-steel link pipe that is welded to the muffler and attached to the stock header. The muffler's core is also stainless steel. Just like the Evo system, the Slip-On's outlet cap and muffler sleeve are done in titanium. The system is attached to the quad using a pair of beefy carbon-fiber clamps. All Slip-On ATV systems come to America with removable, approved spark arresters.
